**RESEARCH INTERESTS**

The design and analysis of algorithms, computational geometry, data mining and machine learning, and the application of such algorithms to interdisciplinary problems and data.

**APPOINTMENTS**

**Haverford College**

Assistant Professor of Computer Science July 2014 - present  
Visiting Assistant Professor of Computer Science July 2012 - June 2014

**Data & Society Research Institute**

Affiliate September 2016 - present  
Fellow September 2015 - September 2016

**Alphabet, Inc.** (formerly Google, Inc.)

Software Engineer, Search Infrastructure (Google) and X (formerly Google [x]) August 2010 - June 2012

**EDUCATION**

**University of Maryland, College Park, MD**      **Ph.D.**      August 2005 - August 2010  
Computer Science.  
Thesis title: *Geometric Algorithms for Objects in Motion*. Advisor: David M. Mount.

**University of Maryland, College Park, MD**      **M.S.**      August 2005 - December 2007  
Computer Science.

**Swarthmore College, Swarthmore, PA**      **B.A.**      August 2000 - May 2004  
Computer Science. Minor: Mathematics.

**GRANTS AND AWARDS**

**NSF DMR-1709351**      2017 - 2020  
*CDS&E: D3SC: The Dark Reaction Project: A machine-learning approach to exploring structural diversity in solid state synthesis*. Joshua Schrier, Sorelle Friedler, and Alexander Norquist. \$645,288.

**NSF IIS-1633387**      2016 - 2019  
*BIGDATA: Collaborative Research: F: Algorithmic Fairness: A Systemic and Foundational Treatment of Nondiscriminatory Data Mining*. Suresh Venkatasubramanian, danah boyd, and Sorelle Friedler. \$953,432 (Haverford portion: \$172,742).

**Knight News Challenge Prototype Fund**      2016  
*Could your data discriminate?* Sorelle Friedler, Wilneida Negron, Surya Mattu, Suresh Venkatasubramanian. \$35,000.

**Data & Society Research Institute Fellow**      2015 - 2016  
*Preventing Discrimination in Machine Learning: from theory to law and policy*. \$10,000.

**NSF DMR-1307801**      2013 - 2016  
*The Dark Reaction Project: a machine learning approach to materials discovery*. Joshua Schrier, Alexander Norquist, and Sorelle Friedler. \$299,998.

- Ann G. Wylie Dissertation Fellowship** 2009 - 2010  
Provides tuition, stipend, and health insurance for one semester. Awarded to “outstanding students working on the final stages of their dissertations.”
- AT&T Labs Fellowship Program** 2006 - 2009  
Provides tuition, stipend, health insurance, and conference funds for 3 years. Awarded to 5 “outstanding under-represented minority and women students” chosen from a national pool.
- Verizon Fellowship** 2006 - 2007  
Monetary award for outstanding academic achievement.
- Graduate School Fellow, University of Maryland** 2005 - 2007  
Monetary award for “academic merit, intellectual ability, and the student’s potential to make a unique contribution to the diversity of the educational experience on this campus.”

### HAVERFORD COLLEGE TEACHING AND SERVICE

Haverford College is a leading liberal arts college with a student body of 1,290 composed entirely of undergraduate students. The teaching load is 5 courses per year, with lab / discussion sections and senior thesis advising counting towards the total teaching load. The college operates under a philosophy of shared governance among the administration, faculty, students, and staff.

### COURSES DEVELOPED

#### CS 104 Topics in Introductory Programming

Topics in Introductory Programming is designed to give a general introduction to programming as related to data analysis across many fields. Students will be introduced to standard introductory

programming imperative and object oriented techniques as well as data structures necessary to create efficient and understandable algorithmic solutions to problems. Data for analysis will be drawn from a single discipline that will vary per semester, forming a theme for topical study. Topical investigations will include the ethics of data use in that field, how data is commonly generated and used, and implementation of important discipline-specific algorithms.

**CS 207 Data Science and Visualization**

An introduction to techniques for the automated and human-assisted analysis of data sets. These “big data” techniques are applied to data sets from multiple disciplines and include cluster, network, and other analytical methods paired with appropriate visualizations.

**CS 395 Mobile Development for Social Change**

Mobile Development for Social Change will focus on standard software engineering principles, object oriented programming, event-driven and multi-threaded programming, Android-specific mobile development concepts, and designing a positive user experience in the context of a semester-long placement with a local non-profit.
